Major Customers: Boeing, Alaska Airlines, Midway Airlines, Mesa Airlines, ATA, BF Goodrich, Timco, Spirit Airlines, Fed-Ex, UPS and USAJET

About the Company: Dodson International is a leading aircraft parts supplier. Parts are acquired by purchase from OEMs, operators, and by dismantling aircraft. Origin and trace is maintained on all items. Inventory consists of airframe, avionics, engines and all types of vendor aircraft components. General aviation types supported include commercial and regional airlines, corporate and general aviation both fixed and rotor wing. Parts are available in various conditions from new surplus, overhauled or as removed. Exchanges are available on select items. We have a broad based inventory of over 250,000 line items representing millions of individual items. This inventory is centrally located in our over 200,000 sq. feet of warehouse on 120 acres. Parts are kept in a dry, fenced, locked and secure facility.

Personnel: Dodson currently employs 40 employees on the main campus.

FAR Part 145 certification: We are not a certified repair station.

Vendors: Dodson has no parts vendors to rate.

Quality Control Program: Yes, we have a written Quality Control Program. This includes A&P mechanics. All personnel in receiving, inventory, sales and shipping are included and trained. No records are kept for training. All parts are stored indoors and properly tagged. Before a part is shipped, it is checked by the parts picker, salesmen and shipping for Part number, Serial number and condition.

Anti-drug Program: We do not have a drug-testing program at this time.

Technical Data: We maintain a large technical library of IPC material to properly identify all parts. We do not accomplish any repair work; therefore Maintenance Manuals are not kept.

Tooling and Test Equipment: We do not use tooling and/or test equipment. We send our parts to an approved shop for service at customer request.

Parts: All parts are properly identified by part number, trace and condition before they are put on the shelf. All scrap parts are removed from the work area. We have a 2-tiered system for identifying life-limited parts. Rejected parts are mutilated and scrapped by the manager of inventory control, Jonathan Harnden.

Records: All parts are guaranteed for 30 days and come with proper trace, such as ATA-106 and 8130-3 or company C of C. Records are kept for a period of 7 years.

Returned Goods: The salesperson is responsible for analyzing customer complaints and goods returned. Please call your salesperson for a RMA authorization number.

Plant Visits: We welcome visits to our facility by your QC inspectors. Please call ahead for directions. We also invite you to visit our website [www.dodson.com](http://www.dodson.com) for the latest news about Dodson International Parts, Inc.

This form was filled out by and is the responsibility of the Quality Control Executive who affirms the information therein:
